

Avio™ Sofa System

Modular and linear, with a visually light structure that blends into any setting, Avio skillfully balances spatial relationships and proportions. The sofa combines functional and aesthetic poise by contrasting the slim structural framework with the substantial volume of the upholstery. Various seating and table combinations are supported by a modular leg system.

Designer

Piero Lissoni

Benefits

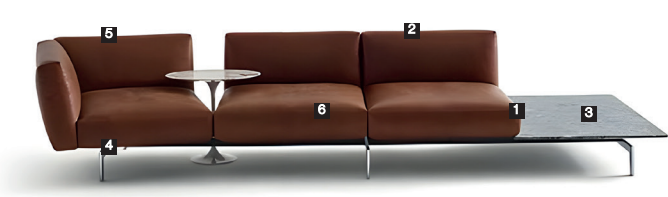

- Modular Approach
- Supporting Inclusive Connections
- Enabling Casual Work Settings

Key Features

- 1. **Two Depths**
Avio is available in a standard depth of 93cm, best suited for residential environments, and a compact depth of 85cm, perfect for contract settings. **Modular**
- 2. Avio's intelligent framework allows for a modular approach to creative combinations that suit any setting. Pre-configured options are also offered to simplify the specification process.
- 3. **Integrated Tables**
Marble or Timber surfaces can be integrated into the sofa, while the Saarinen Table can be positioned between modules to provide additional surface support and enable casual workplace interactions.
- 4. **Rotating End Modules**
Avio's unique rotating end modules can be specified to add flexibility and bring greater inclusivity to group conversations.
- 5. **120 Degree Corner Sections**
The 120 degree corner module offers a more comfortable and inclusive corner angle.
- 6. **Finishes**
Frame finishes are available painted or polished. Upholstery is offered in a range of textiles and leathers, with removable covers for ease of cleaning.
