

Womb™ Chair and Ottoman

Eero Saarinen designed the groundbreaking Womb Chair at Florence Knoll's request for "a chair that was like a basket full of pillows – something she could really curl up in". With its steel rod base and fabric upholstered shell, this mid-century classic is designed to facilitate a relaxed sitting posture, providing emotional comfort and a sense of security – hence, the name 'Womb'.

Designer	Eero Saarinen
Benefits	<ul style="list-style-type: none">• Timeless• Sculptural• Exceptional comfort

Key Features

- 1. **Sculptural Form**
Achieving comfort through the shape of its shell, not the depth of its cushioning, the Womb Chair brings a much-needed sculptural element to the hard edges of any workplace setting.
- 2. **Shell**
Classic: this version adheres to the original design, featuring a moulded fibreglass shell.
Relax: this version features a flexible moulded polyurethane shell.
- 3. **Comfort**
The generous, sweeping form allows for endless positions and extra room for elbows, books or tablets.
- 4. **Ottoman**
Pair with the accompanying ottoman for maximum comfort.
- 5. **Base**
Steel rod that follows the sculptural form of the shell, available in polished chrome finish or painted black. Stainless steel and nylon articulating glides are included.
- 6. **Upholstery**
Upholstered in a variety of textile and leather options.
- 7. **Authenticity**
Knoll logo is stamped into the structure of the chair and ottoman ensuring lifetime authentication.
