

STOFF
NAGEL®

WALL HANGER

MOUNTING INSTRUCTIONS

1

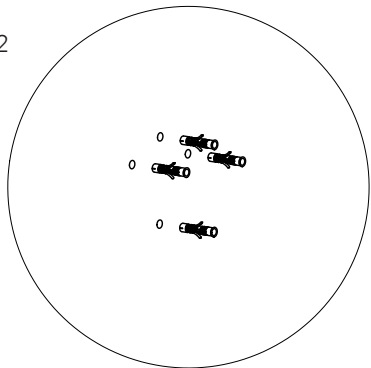

Disassemble the bracket from the candle sconce using the Allen Key (included).

Use the "Mounting template" to mark the holes where drilling is required.
Use a spirit level to ensure the wall bracket is level when mounted.

Drill using an appropriate drill bit for the mounting.

2

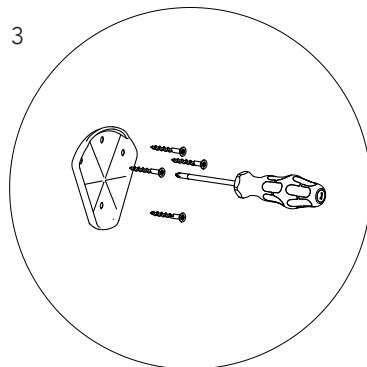

If necessary install wall plugs (not included) suitable for the material of the wall.

Always choose screws and fittings which are suitable for the material of the wall and have sufficient holding power.

NOTE! We recommend that assembly should be carried out by a qualified person as incorrect assembly could lead to the object falling from the wall, resulting in possible injury or damage.

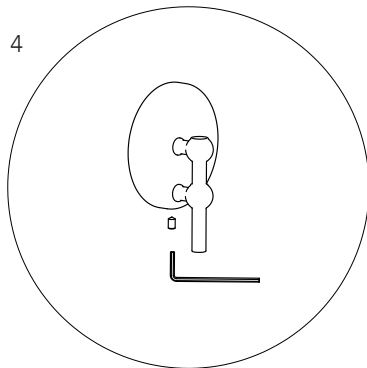

3

Attach the bracket using suitable screws (not included) for the wall.

Different wall materials require different types of fixing devices. Using the right fixing devices ensures the stability and load bearing capacity of the STOFF Nagel wall hanger.

4

Tighten the grub screw with the Allen Key (included) to attach the candle sconce to the bracket.

Check that the STOFF Nagel wall hanger is securely fastened.

Build your candle holder sculpture with a maximum of 35 candle holders. Do not place candle directly in the wall hanger as this can potentially damage the wall.
